Pages overview

Home Page

The **Home Page** is the page that opens when the app is launched. It allows you to view today's popular movies and their main stats, and to search for movies using a character string.

Search Page

The **Search Page** allows you to search for movies by genre. It returns a list of movies corresponding to the desired genre.

Liked Movies Page

Scan QR Page

The **Liked Movies Page** in MovieVerse is a dedicated section that compiles and preserves a comprehensive list of movies you have expressed appreciation for. By utilizing the Like feature, you can easily identify and keep track of the movies that have captivated your interest
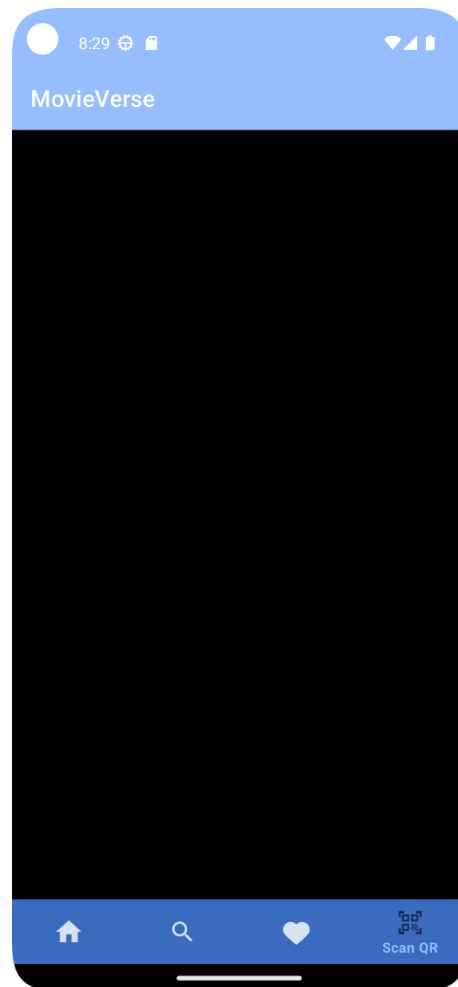

The **Scan QR Page** within MovieVerse presents you a feature that facilitates effortless access to detailed movie information. By leveraging the built-in QR code scanning functionality, you can quickly and conveniently scan a QR code associated with a specific movie. Once scanned, the app retrieves the movie's unique identifier and seamlessly retrieves its comprehensive description. This feature eliminates the need for manual search or input.

Search for movies with a character string

To search for movies with a character string, go to the **Home Page** and type your string, using the search bar at the top of the page.

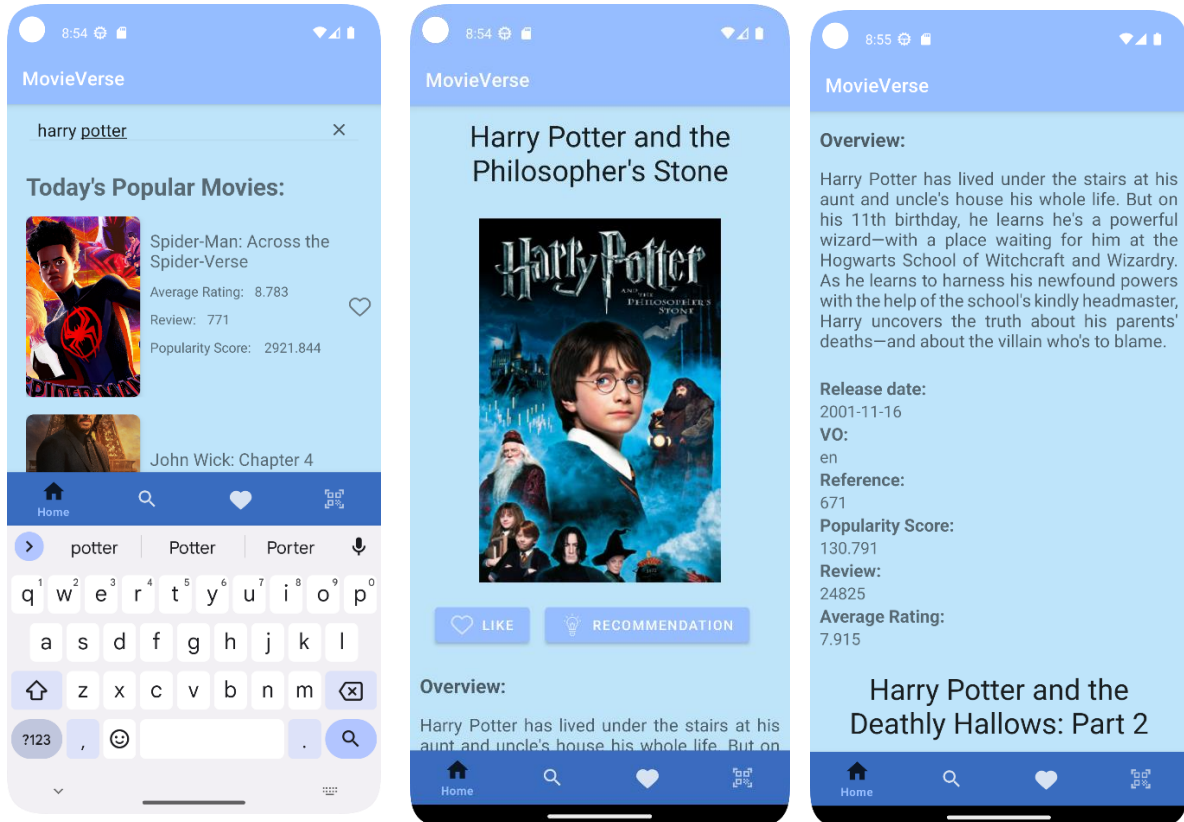

For example, you type "Harry Potter" in the search bar.

The app has found all the movies that suit. In this case, all the movies of the saga Harry Potter are found. For each movie found, the title, the poster, the overview, and other some stats are displayed.
You can scroll the page to see the next movies.

To go back to the **Home Page**, type on the tab 'Home' at the bottom.

Search for movies by genre

To search for movies by genre, go to the **Search Page** and type on the spinner to display the genre dropdown list. Once you choose the genre you want, click on the search button :

1. Type on the spinner

1. Choose the genre you want

3. Click on the search button
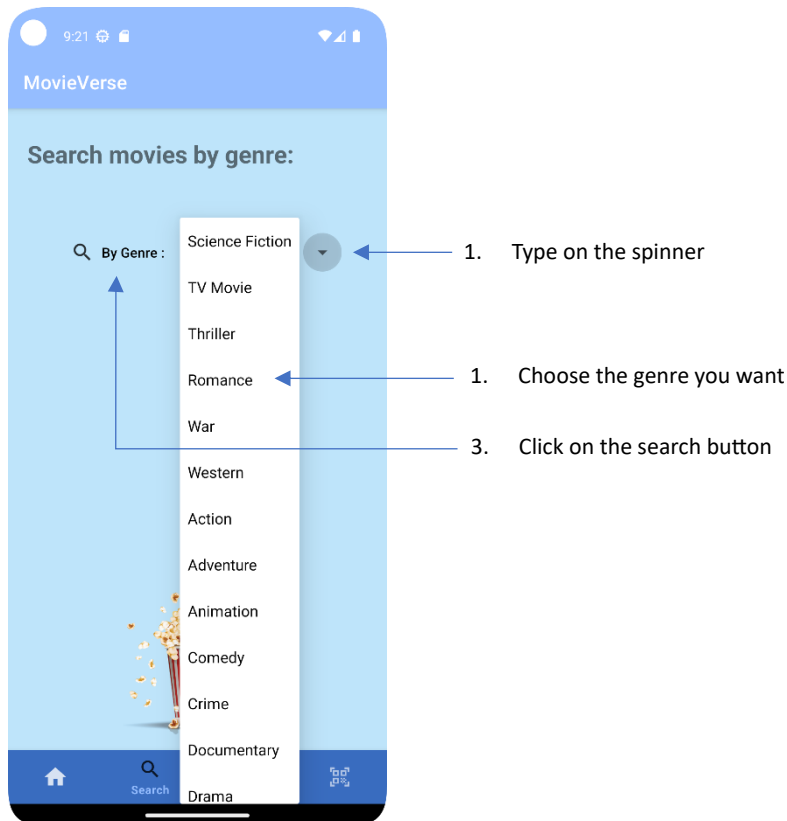

MovieVerse excels at finding movies that align with your chosen genre. The app provides a similar display as when searching for movies using a character string. You'll be presented with a list of movies matching your selected genre, complete with detailed information and engaging visuals.

To return to the **Search Page**, simply tap on the 'Search' tab located at the bottom of the screen.

Like movies

To like a movie and save it on your **Liked Movies Page**, you have to :

Type on the button 'Like' : The movie has been well added to your liked movies :

View the list of recommended movies in relation to a specific movie

In the search results, MovieVerse offers a convenient way to access a list of recommended movies related to a specific film. By selecting the 'Recommended' button, the app will compile and display all the movies that are recommended based on your chosen film.

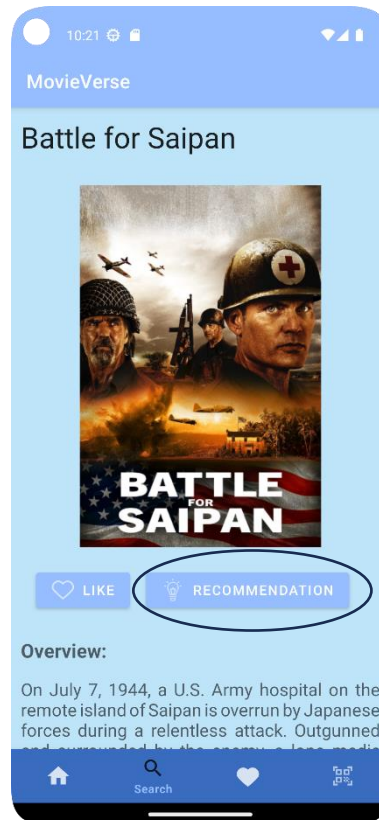

This feature allows you to discover related movies that share similar themes, genres, or other factors that make them an excellent companion to the movie you initially searched for.

Explore the recommended movies and dive deeper into a world of cinematic recommendations that enhance your movie-watching experience within the MovieVerse app.
